MCS-600C

WE PROTECT YOUR WATER

General Description:

MCS-600C is a scientifically designed prime for unpaved road surfaces. MSC-600C has also been formulated to control dust emissions while stabilizing the road. Once applied, it saturates the surface and bonds all the loose particles together creating a durable waterproof surface that resembles a paved road. MSC-600C is an environmentally friendly product that will reduce your rural road maintenance and will aid in keeping your roads intact after heavy rains.

Directions:

PRIME

1. Blade the surface smooth and compact where necessary.
2. Apply the diluted MCS-600 at a rate of .10-.15 gallons per sq yard via a distributor truck.
3. For heavy traffic loads, repeat step 2
4. Allow the material to dry before reopening the road

DUST-CONTROL

1. Blade surface smooth and compact where necessary
2. For unpaved roads dilute 1 part MCS-600C to 5-12 parts water, on high dust roads dilute at 7-12 parts water.
3. Apply with a distributor truck and allow material to dry before reopening the road.
